Attachment A: Items to be seized

Items evidencing violations of Title 18, United States Code, Section 1030, including but not limited to the following :

1. Computer hardware, meaning any and all computer equipment including any electronic devices which are capable of collecting, analyzing, creating, displaying, converting, manipulating, storing, concealing, or transmitting electronic, magnetic, optical, or similar computer impulses or data. Included within the definition of computer hardware is any data processing hardware (such as central processing units and self-contained laptop or notebook computers); internal and peripheral storage devices (such as fixed disks, external hard disks, floppy disk drives and diskettes, tape drives and tapes, optical and compact disk storage devices, and other memory storage devices); peripheral input/output devices (such as keyboards, printers, scanners, plotters, video display monitors, and optical readers); related communications devices (such as modems, cables and connections, recording equipment, RAM and ROM units, acoustic couplers, automatic dialers, speed dialers, programmable telephone dialing or signaling devices, and electronic tone generating devices); and any devices, mechanisms, or parts that can be used to restrict access to such hardware (such as physical keys and locks).
2. Computer software, meaning any and all information, instructions, programs, or program codes, stored in the form of electronic, magnetic, optical, or other media, which is capable of being interpreted by a computer or its related components. Computer software may also include data, data fragments, or control characters integral to the operation of computer software, such as operating systems software, applications software, utility programs, compilers, interpreters, communications software, and other programming used or intended to be used to communicate with computer components.
3. Computer-related documentation, meaning any written, recorded, printed, or electronically-stored material which explains or illustrates the configuration or use of any seized computer hardware, software, or related items.
4. Computer passwords and data security devices, meaning any devices, programs, or data -- whether themselves in the nature of hardware or software -- that can be used or are designed to be used to restrict access to, or to facilitate concealment of, any computer hardware, computer software, computer-related documentation, or electronic data records. Such items include, but are not limited to, data security hardware (such as encryption devices, chips, and circuit boards); passwords; data security software or information (such as test keys and encryption codes); and similar information that is required to access computer programs or data or to otherwise render programs or data into usable form.
5. Any computer or electronic records, documents, and materials, including those used to facilitate interstate communications, in whatever form and by whatever means such records, documents, or materials, their drafts or their modifications, may have been

created or stored, including, but not limited to, any hand-made form (such as writing or marking with any implement on any surface, directly or indirectly); any photographic form (such as microfilm, microfiche, prints, slides, negative, video tapes, motion pictures or photocopies); any mechanical form (such as photographic records, printing or typing); any electrical, electronic, optical, or magnetic form (such as tape recordings, cassettes, compact disks); or any information on an electronic, optical or magnetic storage device (such as floppy diskettes, hard disks, CD-ROMs, optical disks, printer buffers, sort cards, memory calculators, electronic dialers, or electronic notebooks), as well as printouts or readouts from any electronic, optical or magnetic storage device.

6. Any electronic information or data, stored in any form, which has been used or prepared for use either for periodic or random backup (whether deliberate, inadvertent, or automatically or manually initiated), of any computer or computer system. The form such information might take includes, but is not limited to, floppy diskettes, fixed hard disks, removable hard disk cartridges, tapes, laser disks, CD-ROM disks, video cassettes, and other media capable of storing magnetic or optical coding.

7. Any electronic storage device capable of collecting, storing, maintaining, retrieving, concealing, transmitting, and using electronic data, in the form of electronic records, documents, and materials, including those used to facilitate interstate communications. Included within this paragraph is any information stored in the form of electronic, magnetic, optical, or other coding on computer media or on media capable of being read by a computer or computer-related equipment, such as fixed disks, external hard disks, removable hard disk cartridges, floppy disk drives and diskettes, tape drives and tapes, optical storage devices, laser disks, or other memory storage devices.

8. Records of personal and business activities relating to the operation of a associated computers, such as telephone records, notes (however and wherever written, stored or maintained), books, diaries, and reference materials.

9. Radio receivers, radio transmitters, radio antennas, wireless network equipment, and manuals and documentation associated with wireless network
